Mel Richardson +
wife Dawn.

5 Oct Transfer in Brussels
for Kigali

Trip uneventful until
arrival — my bags
+ Borens bags

didn't arrive.

Took >1 hr to get out of customs + to hotel.

Staying at Hotel Milles Collines. Not into hotel until 11 PM. Sandwiches + signing in.

6 Oct 92

Breakfast by pool.
Large fancy buffet.
During the day we have
2 briefings, one at the
Embassy with Ambassador
Robert Flaten who provided
some history of Rwanda
+ update on current
ceasefire. Description of
negotiations between
Hutus + Tutsis at
Arusha, Tanzania most
amusing. With more
advisors ~~[illegible]~~ and
observers than those

involved with the negotiations. He sounds optimistic. Says that this is a unique opportunity to show that you can stop a war with negotiations. Basically the Tutsis want to reclaim power that was lost at the time of independence.

The ORTPN meeting was a classic exchange. Although Charles Banani (2nd in charge) presented some future plans for park management that included putting hotels in the Parcdes Volcans + roads to permit greater tourist access. That scared everyone.

Dignt meetings involved Greg Cummings on London office; Ruth on Internat. Activities; Pat McGrath on current office happenings.

We broke early when Bob Campbell - who had lived w/ Fossey - appeared. Dinner was at a restaurant. I managed to speak with the vet Liz McFie, decided that the Bd of Trustees needed to hear from the "salaried

staff" + students as well as ORTPN, The Embassy + USAID. Liz having a difficult time with Ruth Keesling.

There is a problem of a confiscated lowland gorilla infant that was dumped in her lap. And she needs to find a solution for it.

7 Oct
We

7 Oct 92 - Borrowed some pants from Charlene Gendry (Columbus Zoo keeper) + T-shirt from Marion Woods (on tour), but luggage still not here.

Morning meetings w/ Cummings + Dieter Stehlis report. We propose a meeting of Bd w/ employees for after AID meeting. Dieter + Liz talk to [redacted] re: they are pleased w/ the idea.

Long lunch break (we are still eating by pool); I borrow a swimsuit from Charlene + swim.

Am feeling annoyed at sitting in hotel for 2 days.

AID meeting is informative. There is a lot of money

some of which can be put into biodiversity — This is currently funding non-gorilla work at Kariosoke + there is more to be had.

After AD we were supposed to have the Bd meet w/ slides etc for briefing.

Ruth K. bowed out saying that she had to decorate for the banquet + "it was only scientists".

Pat McGrath + John Woods ~~[illegible] [illegible]~~ blew out the whole 3rd floor electricity with a faulty adapter + went hunting the electrician. Several others forgot or went to sleep.

Liz McFie was v. upset since she had just been subpoenaed to come to court on charges of murder. During war, she was out w armed tracker who was helping her climb a ravine + shot himself since his safety was off + gun loaded. Happened in Feb + she thought it was over. Apparently the man's parents think they can get some $.

We all went downstairs for a beer to plan a strategy. Decided to hold the ~~[illegible]~~ meeting at Kariosoke + that Liz + Mel + Dawa

Richardson would come up
for it.

Banquet (in borrowed clothes!)
was incredible. Ruth + Tom
Keesling have 64 people —
from Embassy, ORTPN, local
school districts, AID, Rwandan
govt (Minister of Environment).

I am next to Mayor of
one of sister schools where
Ruth K. has started ~~a~~ a.
curriculum exchange pgm
and the minister of Environm.
The Minister has a 7 year
law degree from Roumania.
Chas Bandni has been
Ambassador in Russia.

7 Oct
Wed

The ~~young~~ young man
who is to start working
with ORTPN as Educ. Coord.
trained as a molecular
biologist + veterinarian in
Vienna.

The Rwandans are
still interacting significantly
with the French + Belgians.
Clearly have had loss of
contact with Eastern bloc.
The Chinese built the roads
+ some parts of the drainage
systems with the roads.

What @ Rwanda?

(1) 30% average rate of HIV infection. They are being used as a model for vaccine development because they are reasonably open @ AIDS problem. Up to 60% infection in cities

(2) Rwandan ♂s want at least 8 children. But family planning educ. falls mainly on ♀♀. They are trying to get contraceptive info. to women. No ♂ education as yet.

10/9/92 10⁰⁰ hrs
Contact w/ Bekeme's

(3) women & children seem to do most of the farming. ♂s are unemployed & looking for work.

(4) 70% of country <12 yrs. As much poverty as I've ever seen & hunger.

(5) Every sq. inch of land is under cultivation. They use terracing on the slopes. Pyrethrum

was (and is) a big staple but they also grow coffee + tea,

6) I keep asking whether $ is being put into education of kids in biology or why — after all these years — there aren't more trained Africans in place to work in conservation

I think there is some incredibly basic white prejudice about the intelligence of Africans that won't quit.

Why is Africa so much different from South America, India, Asia.

8 Oct
Th

8 Oct 92

We leave for Ruhengeri relatively early in 3 buses; (altho 1 hr later than planned) Road is paved the whole way. Apparently the Chinese were in to do the roads + did some rather nice drainage work, using stones along the roads. We also pass a Chinese graveyard.

We were supposed to meet at the Muhubura hotel in Ruhengeri at 10:30; arrive @ 1:30. Meet with ORTPN officials

The 1st official task is to present to the Ruhengeri hospital an anesthesia machine.

① Liz McFie has been unable to move the machine thru customs,

② We were so late that the doctor who was supposed to accept the machine had gone home!

We were surrounded by curious people during the presentation. Dieter translated for Ruth Keesling. She is in her element with these presentations & every presentation requires a plague to accompany it. I suspect that Ruth is responsible for keeping a full shop of plague makers busy!

Why an anesthesia machine? Because someone had contributed one to the VVC & the local Ruhengeri's were insulted that Americans would give anesthesia machines for gorillas but not people.

The next event was the "ground breaking" for the Dian Fossey Museum next to the offices of ORTPN.

(Aid is paying to improve ecotourism)

It was a v. ~~[illegible]~~ emotional moment for evil people. Sandy Price + husband had arrived in Rwanda ~~[illegible]~~ & were just about to go to Karisoke when the news came down that Dian had been killed. They never had the opportunity to meet her, Bob Campbell had been her lover + had not been back since soon after her death when they were filming Gorillas in the Mist.

And of course Ruth nearly broke down. They all had a brick wall, with the Volcanoes behind them.

I finally began to get an inkling for Ruth Mowling's involvement — for why she was so fanatically committed to the Digit Fund. There

was quite a lot of mystical emotion floating there.

Ruth did however present 2 more plagues to the 2 ORTPV men, Banani + ?.

After the ground breaking we had lunch at the VVC which was where Liz McFie had been living but it was trashed by locals after the war started.

It was a nice structure w/ a pretty garden w/ Jim Foster had designed + built.

Bits of the bizarre!

Tom Keesling brings these huge quantities of food most of w/ goes first to the pregnant cat + then to the local begging children.

There are lots of begging children (+ begging adults)

After lunch we go straight to point where we ascend to Narisoka.

There is absolute chaos as all men compete to be porters & some are finally chosen

It's a 2 hr. walk up to camp, over some pretty rugged & muddy terrain. The altitude feels pretty bad. Pat & Ruth are carried up by litter

By the time we reach Kanoke it is dark. We have a tough chicken dinner & everyone collapses.

9 Oct
Fr

9 Oct 92 -

Up @ 06[00] hrs.

I am rooming with Mary Smith in the new house just built on the site of Dian Fossey's former cabin.

Breakfast is @ 07'15 & the 1st group of people goes with Dieter Stekis to see gorillas. I go with John Woods, Frank Doren, Sandy Price & Pat McGrath.

We are heading to Beetmee's group.

The only other available habituated group — #5 —

9 Oct
Fri

has had a lot of tensions, ~~because there~~ because there are several silver-back ♂♂. and the males have attacked several people. Alison Fletcher was bitten seriously several times; and Lori from San Diego was thrown around.

We found the gorillas after tracking their trail for a while. We made contact @ 10¹⁰ hrs after walking for @ 1½ hrs.

We were on the hillside with the gorillas in some fairly open areas.

The Silver-back or Titus was in the Ctr. at one point he charged and displaced a ♀ from a site — where he then collapsed for a sleep.

There were at least 3 infants; showing lots of play —

— climbing trees
— backwards somersaults
— slapping at each other.

They were curious @ us, but then went over

9 Oct
Fr

to Titus + played around
him. One of the ♀♀
was still nursing one young
+ had an older offspring
nearby. I may have
got some nursing photos.

The gorillas are eating mainly
wild celery + some nettles.

The gloves are surprisingly
important. I had some
nettle go thru my glove
+ it stung seriously for
@ 5'.

9 Oct
FH

We manage to spend @ an hour sitting near the group, w/ awe Tab & RF surrounding Titus and the group mainly resting + eating.

The gorillas make an enormously destructive path as they move, + the trackers probably have an easy time.

We are close to the top of the mtn. while with them. The walk back takes at least an hour + I am bushed by the time we arrive.

We have a quick lunch & they let me go out again since Ruth & Ken Musgrave cannot go & Bob Campbell is spending the day with Group #5.

Just sitting & eating is restful so I decide to go. Al's Dicker, Greg Cummings (Digit Fund Engl.) & Mary Smith (NGS).

We trudge back to where the group was only to find that they had descended significantly

9 Oct
Fri

and we had to climb downhill, after ascending nearly to the top.
Eventually we had to ascend again since we had gone below the level of the trail that led back to Kanoke Camp.

The PM observations were much more fun than the AM. once we finally found gorillas.

We got to see Beethoven the former dominant ♂ who is now silverback but not dominant.

9 Oct
Fri

He stays w the group +
is tolerated reasonably well
by Titus + even ——
apparently — copulates
occasionally.

Greg dragged Dieter well
beyond Gary + D, the
aim being to photograph
Dieter with a gorilla + a
Macintosh laptop. Dieter
dragged his computer all
the way out with the idea that
Greg could get Apple to
supply the camp w/ 2
laptops, if the picture
worked.

Mary + I were sort of following them when we more or less got in the way of some gorillas that wanted to move.

Mary was worried that we were too close to a cranky ♀ + tried to withdraw. I encouraged her to sit + let them pass; which they did.

We were within touching distance of the ♀ + kids, who were actually following Beetsmee.

We turned back not too long after + it began to pour.

It was amazing how quickly
the weather changed
during the day. From
powerfully strong sun — as
during the AM trip — when
you need few clothes +
sunscreen to a locked-in
cloudy rainy bone-
chilling cold.

In any case, we had to ascend
to reach the trail back to
camp + things got slippery
+ muddy + miserably wet.

On the road back to camp
we were suddenly facing
a stream of soldiers + boys

descending from camp.
It was a raggedy-group, in all
manner of military gear.
with automatic weapons,
grenades, radios; The boys
carried bullets;
Some wore shoes; some barefoot,
some had rain gear; some not.
They kept coming & coming
& Dieter was visibly worried.
Finally, a few seconds after
a man passed with a
"rack" from a bush buck, the
"chief" stopped & explained.
There had been an attack
by the rebels on a small
town. Then a rumor that
the rebels were in the

neighborhood of Karisoke. The chief recommended to Dieter that we descend.

At one point, a grenade dropped from one soldier, bounced off Mary Smith's buns onto her tracker & to the ground. The soldier picked it up w/ a smile. The safety pin was in!

altogether we estimated about 120 men & boys climbing down the mtn. They said they were going to spend the night searching for the rebels.

(We had previously seen a tented camp near Kenigi, + noticed lots of roadblocks on the road to + from Rubengeri, Gisenyi + eventually Akagera.)

We finally got to camp soaked to the bone — couldn't figure out how + where to put clothes + boots to dry.

The large room had been opened up — for the evening fete.
Sat + started drinking

Scotch. Ruth filled my
Tea cup with it after
putting some Tea in it.

Then Re Afr. camp staff
started into the bldg.
Eventually we had @ 30
Rwandans + The Board +
Karisoke Orologists.
Dinner was buffet
rice; spagetti sauce; veggies;
beans (had gas all night)

After eating, presentation
of bonuses to the camp
staff + They pulled
out The "banana
bear"

whl was terrible - tasting.

Then 2 of the men started drumming + at various times over the next hour different men got up to dance.

Greg Cummings did some drumming w/ the lead drummer — which was nice to see.

(Greg was v. B upset since he had dropped his borrowed camera on the road back from gorillas — Dieter had picked it up in muddy H20).

There were pictures taken.
Eventually Bob Campbell got
up, said in Swahili that
he was an old man + needed to
go to sleep. Still took >1 hr
to clear the building of
smoke + drunk Rwandans.

18 Oct 92

Woke up to miserable rain.
Had breakfast & then
had the meeting with the
Board + the Karisoke staff.
(Ivy McFie + the Richardsons
weren't able to make it)
Main issues brought up:
(1) What to do with the lowland
gorillas now at the VUC
(but confiscated in shipment)
Bd voted not to bring the
animal to Karisoke.
(2) Need for > input from
SAB on projects.
(3) > communication between
Denver & Karisoke
(4) Getting rid of mines near
border w/ Zaire.

The discussion was useful.

Rain let up a bit and I decided to go out hunting gorillas again.

Visited the big meadow behind camp. Saw a duiker browsing. Saw remains of a duiker or bushbuck (legs + skin)

Then finally stalked out w/ Dieter / John Woods / Frank B / Sandy Price / Ken Musgrave + / me.

We climbed more than yesterday — and climbed — climbed.

The road was incredibly muddy + steep, but

The rain had stopped, but it was still cloudy.

The climb was terrible but we finally found the group. The infants were climbing trees, eating, playing. We were closer to Beckme at one point but Dreier found Titus so that Ken could see him since Ken had adopted him.

At one point we were in the middle of the group — They wanted to pass.

I was at the end of the line + Sandi, Ken + Frank had climbed up and over a cliff while John + D

were behind.

Titus led a line in front of the others so that the gorillas passed right in front of the seated people. Titus was in touching distance & everyone dropped their loads & bolted away.

Much of the group ascended - I followed them up: We then had another 30' of the nicest gorilla-watching yet.

Titus was there with ~~Sesse~~ Beetsme close - in full view. Both were

feeding. There were several ♀♀ + the 4-5 infants.
Altogether we had in ~~view~~ view @ 14 gorillas, many in the open, feeding + playing. The ♀♀ had a tiff, with 2 ♀♀ chasing off a third. Lots of contentment grunts One set of threats by the ♂♂, pig grunts ——— The animals seem to be doing a lot of talking to each other.

I'd love to come watch for longer.

Anyway we got the best views of gorillas of all 3 visits, but not

one camera among the 5 of us.

We finally started down ←
with piles
still muddy + slippery
we slid down the hill.

Ended up meeting Greg ←
some porters half-way down
+ then continued.

Except for one flat tire
the trip to Oseyji was
uneventful. We met up
with Board spouses.

The warm shower was
incredibly invigorating after
being so muddy, wet, +
cold for so long.
Threw all my clothes on

The porch to dry (later washed off Re boots + gaiters).

Had dinner w/ Ros Carr + crew + then collapsed.

11 Oct 92

Left for lunch at
Ros Carr's @ 10^00 A.M.
Before did my only shopping
tried my hand at bargaining
+ picked up a few
pieces of wood etc.
Not much to buy +
not many places to buy it!

Ros Carr has a
beautiful 1938 cottage +
a farm where she grows
flowers.
She seems to survive
on not v. much money.
She has talked about
$100 being enough to

cover a years tuition for
a Rwandan child + how she
organizes sponsorships.

It rained before + during
lunch, but miraculously
cleared before the Rwandan
dancers. There must
have been 200 villagers
around, mainly children,
all in hand-me-down
Western rags. They received
~~all~~ the remnants of
our lunch. Many South
gave Roscan $100 +
asked her to buy clothes.
! It's a drop in the bucket.
The dancers were in 3

groups of 40-47
(young; late adolescent &
early adult). They
mainly did a courtship &
welcome dance. Ros has
been encouraging the native
dancing & ensuring some
financial compensation for the
dancers.

I left early w/ the Borens,
Tom Keesling & Bob Campbell.
We returned to Nyali &
then the Borens & I
continued on by car to
Nakuru Park — We arrived
@ 8 PM, had a beer
& dinner & collapsed.
The hotel is beautifully
situated on a lake

and looks over exquisite savannah slopes + valleys.

We drove in at night + were stopped by roadblocks on a regular basis. Some seemed slightly menacing.

The Hotel was <u>empty</u> except for us + 3 young men, a result no doubt of the war. The Rwandans are losing too much $.

12 Oct 92

Spent the day doing a "land safari" driving from Akagera north to Lake Birengero, back South to Lake Ihema & back to lodge. We saw a lot of wildlife & John our driver suggested that it was a pretty good days viewing for the South of the park.

Very much a savannah park with scrub/small trees as vegetation.

We saw

- warthog
- elephant (tame ones at village)
- hundreds of impala

— large herd of buffalo
— 3 giraffe (introduced + non-native)
— bushbuck
— reedbuck
— oribi
— baboon, vervet, blue monk
— dwarf mongoose (+ many mounds w/ burrows)
— 2 young waterbuck
— several grps of zebra
— several grps of topi
— hippos (also not in huge numbers)
— crocodiles

Birds: kingfisher, fishing eagle; spur winged goose, francolin; marabou stork

open-billed Stork, cormorants, guinea fowl.

Got back to lodge @ 1530 hrs (had left at 0830); quickly had a beer showered, packed + left.

Missed my Kongo slide — a baboon drinking from the swimming pool.

Drove Rhagera → Kigali and arrived in time to meet group and go to airport. Tom Kessling ran us Thru one-by-one. He is incredibly impressive

in this dealings with detail.
ORTPN was there as were
the Richardsons, Liz McFie,
+ Dieter Stehlis.

Plane ride to Brussels
wasn't too bad. Tom had gotten
most of us empty seats nearby.
I managed to sleep.

GENERAL THOUGHTS

Rwanda: Incredibly poor, a huge % of the popn is < 12 yrs. old: Every sq in of land is farmed. It was amazing how the cultivation was right up to the Park boundaries. They are growing bananas, beans, pyrethrum, potatoes; You see lots of goats, few cattles, few chickens.

No obvious dogs + cats. Unlikely that any wildlife survives in cultivated areas except rats.

The gorilla habitat is restricted to the

higher slopes of the Volcan Park + people are pushing higher up the slopes.
A good daily wage is < $3.00.
Women + children work the fields + care for domestic stock. Men can't get jobs + thus don't work.
Huge sex dimorphism in power politically + personally. Men insist on their B children.

But 10% of the country is in protected land — which is an enormous proportion. And Rwanda is tiny + the most densely

populated of any African country (750 ppl/sq mi)

The Hutus are running almost everything but are nowhere near as bright as the deported Tutsis. who apparently developed the terracing system.

The Dian Fossey Gorilla Fund:

The mix of people was fascinating. Frank Boren, quiet but v. creative — intelligent: Ken Musgrave, the petulant judge who missed the meeting with the president + who decided to resign — a needy man who ~~needs~~ requires considerable TLC

Ruth + Tom Keesling are amazing. For all of Ruth's need to control, I ended up liking her. She has unending energy + spirit + altho she is very often very short-sighted she has kept the Karisoke Research Center alive and continues to badger the Rwandans to do the correct thing. She can be petty, often lies or changes her story, but is superbly generous in heart + in fact.

Tom is an enigma since he is a consummate organizer, a deep thinker

altho he (+ Ruth both) indulge in a lot of name dropping.

He travels constantly + loves it + dealing with people. His attention to detail is amazing + it feels as though he is always on top of it. He is loud + brash — has an "ugly American" air about him but he is thoughtful.

John Woods seems a straightforward nice person, his wife Marion having a more complex background that I never understood.

He's a banker + of course they are rich.

Bob Campbell, like Mg is an outrider + he is v. standoffish at first but eventually — by last day — relaxes. He has a wonderful sense of humor.

Ken Musgrave is a bit childish — lost his wife 1½ yrs ago to a heart attack + a daughter to cancer. Second daughter just had miscarriage.

Never was able to figure out Sandy — Harold Price. I felt she disliked me. She

was her husband's former secretary, is wealthy, works in family planning.

Mary + Tom Smith are lovely to be around. Fun, amusing, relaxed. I told Mary my whole history w/ Dan before sleep at Karisoke. Mary occasionally name-drops but is much less pretentious than she could be.

We talked about a few times — our commonality.

Thoughts @ Karisoke
Digit

They need
① to train African univ. students
② get an African camp manager
③ do surveys of major vertebrate groups via contracts w/ biologists
④ begin long term prodiv. studies
⑤ advertise for new director
⑥ put responders into every area the tagged gorilla + develop a protocol for processing.

(7) straighten out relationship between VVC + Karaoke directors.

We voted down bringing a confiscated gorilla up to Karaoke.

(8) activate the SAB so that they do more constructive criticism. Broaden SAB disciplines. Use them almost like field editors.

Gorillas + Habitat

I was constantly struck by similarity between gorillas + pandas.

— No fine-tuned facial expressions

— Habitat destroyers —

(you can follow a gorilla group with ease by their trails)

— Lots of vocs.

— Chest beating can be heard at great distances, but most other vocs are contact calls

The group can be widely separated. Probably

communicate via moving limbs and sound.

Orphans remain v. woolly up to 8ish years.

(On our last gorilla visit we had an adolescent passing us by & eyeing us 8ish times).

our crew actually did
have a 1 hr audience
with the President
of Rwanda. Apparently
he was v. charismatic.
Suggested that the
rebels were demanding
too much.
